Following on his extraordinary ac tion in prohibiting the use of electricity in theaters and the introduction of bicycles, the sultan of Turkey has for bidden the use of balloons or carries pigeons for army purposes. The reason is not stated, but his great terror of plots against his life may have something to do with It.

John and Rachel Scott of Randolph county, West Virginia, and their children, have been weighed recently. The father and mother are still living in whose combined weight is more than a ton, were born and raised. The combined weight of the family is 2,796 pounds, an average weight of 276.3-5 pounds.

In Germany a furnace has been invented intended for burning low-class fuels, such as lignite and peat and in which the combustion is intensified by turning into the fire the gaseous mixture obtained by the evaporation of liquid air. The nitrogen is first a t free and the residue, containing at least 50 per cent of oxygen, is sent into

A philanthropic Greek, who recently sum to be applied to the purposes of a matrimonial lottery. Every year a certain number of poor girls, of good conduct, will receive tickets entitling them to a chance of winning a sum sufficient for a marriage portion. The committee entrusted with the administration of the legacy is presided over by the Archbishop of Corfu, and the winning number is published in the The fortunate candidate presents herself, and all inquiries being satisfactorily answered, the money is

Of interest to all students of Greek is the announcement from Athens that the "Clouds" of Aristophanes, paraphrased into modern Greek by the satiric poet Souris, has been produced in the national theater in that city. Souris, who has been called for 30 years the "Modren Aristophanes," is said to have surpassed all expectations in his metrical rendering of the play. His work should be especially valuable to philologists as a basis of comparison between ancient and modern Greek, the language as it is written oday being said to be closer to that of Xenophon and Plato than is the English of today to the English of Chau-

Mississippi may have another Helen Kellar in the person of a little girl from Webster county, who arrived at the Deaf and Dumb institution about ten days ago. The child is Maud Scott, six years of age, and her parents live at Cataletta. She has been deaf and dumb from birth, and when she was about a month old she became blind, She is in charge of one teacher, who devotes nearly her whole time to her, and the child is beginning to give some remarkable signs of dawning intelligence and capacity to receive knowl-The improvement is noticeable even for the time she has been there, and she is much less dependent now than she was when first brought to the

The City Club of New York has Issued two small pamphlets which are useful to New Yorkers and suggestive | would like to hear it so much!" brief index to the city charter, the other a brief summary, in chronological order, of the various events prescribed by the charter to occur during the year. It thus comprises a list of the official acts of the whole city government, and from it one can learn the grecise duties of any and all officials, The ordinary citizen often realizes his ignorance of the local government, and his consequent inability either to fulfill his civic duties properly or to derive all the benefit he might from the operation of the government. These little pamphlets are designed to meet his need.

Chicago physicians have recently had the opportunity of examining several persons who were treated for consumption by the nitrogen compression method first promulgated by Dr. J. B. Murphy at the congress of physicians in Denver several years ago. The method consists in injecting nitrogen gas into the pleural cavity, the theory befor that the pressure of the gas compresses the lung, enabling it to take a rest and permitting the unbindered cure of any disease affecting it. Dr. Augustus Lemke, who presented the cases shown in Chicago, made no claim that he had effected a cure, but he said: "The symptoms of tuberculosis, which were pronounced in these cases when they applied for treatment, have all disappeared. The fever and coughing have ceased, and the patients have slept and eaten well. They have all gained in weight and show no evidence of disease.

During the recent trip of the Beiglea in the Antarctic more than 60 observations of the aurora australis, the southern counterpart of our northern lights, were made. The appearance of the light resembled that presented in the Arctic regions. But the maximum frequency did not occur during the months of the long polar night, and the phenomenon was most intense at the time of the equinoxes, when the sun is perpendicular over the equator and daylight is simultaneous at both the North and the South Pole.

A scheme for building a railroad to the summit of Mont Blanc is being discussed at Geneva, The most favored plan is to start the line from Les Houches, on the Savory side, whence it is eleven miles to the summit of the mountain. The plans provide for twelve stations, with every convenience for travelers. The trains will be propelled by electricity, which will be obtained by utilizing the river Arve. The author of the scheme, M. Fabre, a Frenchman, has submitted his plans to the French government.

During the past year the state Pennsylvania has purchased more than 100,000 acres of land to be used as a forestry reservation. The policy of us ing land that is not adapted to agriculture for the purpose of timber culture has been adopted by both Pennsylvania and New York.

Lord Salisbury has never been of commons, and Mr. Gladstone though he was in parliament for sixty years, was never seen in the smoking

That the doubts, perhaps, but aside from the harvest of trouble and loss of life we may have to reap, citizens are als looking to the harvest of debt that must follow, though we are now at our wits' end to devise means for paying what we already owe. Some of them every soul under the Temple-Dene are inclined to suspect the governor of a kind of "after us, the deluge" policy,

TOO EXTRAVAGANT.

A Defaulting Cashler Ats Ham Boiled in

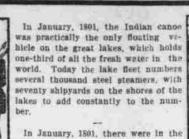

Champagne. The manner in which one defaulting ashier was detected was rather pecular, says the Louisville Times. It was all due to the currosity of the women of his neighborhood. He went to no expense in the way of dressing, they never heard of his gambling or drinking to any extent, he was a model hushand, but he loved a good table. There was nothing unusual in this, but one prought all his strength of will to day when the ladies of the vicinity were discussing the best methods of cooking meats the wife of the cashier me but he would ever know how declared very innecently that her husband doted on ham, but he would not And now it was all in vain, for eat it unless it had been boiled Since the journey on the Canadian exclaimed the listeners. "Heavens, how expensive; we couldn't afford to have ham on our table often if we cooked it that way." It was soon noised all around the neighborhood that Cashier Blank was a high liver, indeed, and the men began telling of his uplifted ideas of cookery. This soon reached the ears of the directors of the bank, and they concluded it might be wise to investigate the accounts of such an epicure. Plain water was all they could afford for their hams, so the champagne lover was called up and subsequently relegated to the pen, where he had to forego his pet dish for many, many weary days,

SAYINGS and DOINGS

1901

Would Signal to Mars. eve the people of the planet Mars are trying to signal the earth. The luminous points observed by Professor Douglas, he says, are due to sunlight gests that a good way to attract the seilles, Strasburg, Paris, Amsterdam, lights would reproduce an outline of uminous points the same in arrangement as that presented by the stars forming the constellation of the Great Bear, or Big Dipper, in the northern sky. The Martians seeing this might respond with another such figure, and thus communication would be set up between the intelligent being in the two planets. Professor Flammarion is the most enthusiastic of the astronomers who are interested in Mars. He firmly believes that the planet is in

habited by creatures superior to men, and his writings in the subject are full of thrilling interest.

The Embezzlements in 1900. Although the embezzlements of 1900 how a decided increase over those of 1899, it is to be considered that the total of last year was the smallest in 23 years. The figures for 1900 are \$4,-602,134, as compared with \$2,218,373 in 1890, an increase of \$2,383,761. Large as this sum appears, it is far below the average of the last 23 years, which is

The losses for the year are distribut ed as follows: Stolen by public officials, \$1,183,678; from banks, \$1,857,761; by agents, \$271,878; forgeries, \$156,900; from loan associations, \$125,100; by postoffice employes, \$24,427; miscellaneous stealings, \$982,390. Bank employes have the unenviable reputation of heading the black list,and more than three-fourths of the bank total was taken by six employes, in Newport (Ky.), Fort Worth (Tex.), Elizabethport (N. J.), Buffalo (N. Y.), Rutland (Vt.), and New York city banks, under conditions which would not have existed had the embezzlers been under proper surveillance and the banks been conducted upon safe business meth-

There is nothing discouraging in the increase for the year, however, as it is by the bullet wound, and the men constill far below the average. The comparatively small sums embezzled are an evidence of the general prosperity of the country. In 1883-84 the totals were \$26,504,000 and in 1893-94 \$35,-263,714, and these were hard times

show cause why he should not be punished for contempt of court, is one of the youngest judges has served on the year. Judge Wiest

bis elevation to the bench Judge Wiest divided his time between the practiof law and of agriculture,

The butterfly invariably goes to sleep ead downward, its eyes looking straight down the stem of the grass It folds and contracts its wings to the atmost, partly, perhaps, to wrap its body from the cold. But the effect is to reduce its size and shape to a narrow ridge, making an acute angle with effects on the clouds of the earth's the grass-stem, hardly distinguishable neighbor in space. Flammarion sug- in shape and color from the seed-heads on thousands of other stems around. attention of the Martians would be to it also sleeps on the top of the stem, arrange great lights at Bordeaux, Mararal finial of the grass. In the morn-Copenhagen and Stockholm. These ing, when the sunbeams warm them, all these gray-pied sleepers on the grass-tops open their wings and the colorless bennets are starred with a thousand living flowers of purest azure Side by side with the "blues" sleer the common "brown heaths." use the grass stems for beds, but less carefully, and with no such obvious solicitude to compose their limbs in harmony with the lines of the plant. They also sleep with their heads downward, but the body is allowed to droop sideways from the stem like a leaf. This, with their light coloring, makes them far more conspicuous than the blues, Moreover, as grass has no leaves shaped in any way like the sleeping butterfly, the contrast of shape attracts notice. Can it be that the blues, whose brilliant coloring by day makes them conspicuous to every enemy, have learnt caution, while the brown heaths, less exposed to risk, are less careful of concealment? Be it noticed that moths and butterflies go to sleep in different attitudes Moths fold their wings back upon their bodies, covering the lower wing, which is usually bright in color, with the upper wing. They fold their antennae back on the line of their wings. Butterflies raise the wings above their bodies and lay them back to back, putting their antennae between them, if they move at all .- London Spectator,

FIGHT WITH LION.

Three Cowboys in a Wrestling Match with a Huge Beast.

Three Tonto basin cowboys had a wrestling contest with the Targest mountain lion ever killed in Arizona few days ago. The men, George Hubbard, Hardy Schell, and A. C. Harer, were riding the range near Salome creek. Schell had the only firearm in the party, a rifle, and had only one cartridge for it. The cowboys routed the lion out of some rocks and rode after it to rope it if possible. Schell tried a 200-yard shot and knocked the lion over, apparently killing it, with a bullet through its neck. The three then rode up and dismounted, to find that the lion had only been stunned by the shot. As they approached it jumped to its feet and leaped at Schell, who knocked it aside with a blow from the butt of the rifle. The enormous cat then jumped upon Hubbard, crunching the man's left arm and badly lacerating his body with its claws. But Hubbard, who is possess ed of exceptional strength, caught the beast by the throat and a front foot Schell, at the same time seized the hind feet, while Harey ran in and cut the lion's throat with a small knife. The llon undoubtedly had been weakened sider themselves fortunate to have escaped with their lives. The skin meas-

ares 9 feet 10 inches from tip to tip.

The Decay of Intellect. Andrew Lang is mouning over the decline of intellect. Why he does so s difficult to say, for Mr. Lang's versatile and voluminous writings find a eady market and many reads in the Critic he discourses in this manner: "The human intellect, like 'the service, has long been 'going to the dogs.' Old-fashioned people tell us that 'nobody reads anything but newspapers and novels.' Many critics in the serial reviews apologize for noticing a work that is not avowedly a work of fiction. Most reviewers have long dropped the hypocrisy of pretending to own any acquaintance with the subjects of historical, antiquarian, anthropological, mythological and other erudite books. They frankly avow their ignorance, unashamed. Poetry is still 'a drug in the market except when some new bard is welcomed as an exquisite blend of Shakespeare and Racine, 'Literary gossip s concerned only with the wealth attained by a few manufacturers of fus tian. Lately I saw a grown man reading Sully's 'Memoirs,' in French, too, and, like the Ancient Mariner, ' blessed him unawares," so unusual was the spectacle. The classics of all lan-

print, have become 'glorified school

books."

Some years ago, writes a correspondent of the Dally Chronicle, Mr. Dolby. who was Charles Dickens' manager, and has just died "miserable and penniless," in Fulham infirmary, was in a quite respectable position, but was fast drifting into a reckless, vagrant life. He was fond of recalling his association with the novelist, but never told any anecdotes about him. He accompanied Dickens on his reading tours, and his services were greatly appreciated. On one occasion Dickens wrote from Liverpool, "Dolby would do anything to lighten the work, and does everything." In another letter from Glasgow, he described him as "an agreeable companion, an excellent manager, and a good fellow." wrote a book entitled "Charles Dick ens as I Knew Him," which Miss Dickens considered "the best and truest

Boar Discovers Antimony. The pig is so fond of truffles that it employed in many parts of France unearth these valuable subterranean growing fungl. Near Aurilac, in the department of Cantal, an old boar, while thus engaged, discovered the famous antimony deposits which have since made the fortune of the district. Similarly, the existence of the Kimberley diamond fields is said to have been first revealed to a Boer farmer by an inquisitive sow; and, centuries ago, the Spaniards stumbled in a like manner upon the silver mines of Potosi. This latter fortunate incident-fortun-

ate, that is, for the Spaniards, but dis-

astrous to the Indians-is commemo-

rated by a silver pig with jeweled eyes,

picture of her father yet written."

which is preserved to this day in the cathedral of La Paz. -- Answers, Belongs to Husband's Family. From the time of her betrothal Chinese girl belongs to the family of her prospective husband, and often when her own family is poor or feels unable to afford keeping her until she reaches a marriageable age, she is sent even while a mere child to her husband's family to be raised by them. Even when she stays at home she worships not the tablets of her own ancestors, but those of her husband's.
